1:00 pm - 2:30 pm

Virtual on Zoom

Enrollment Limit: None

A Pennsylvania woman of the early 1900's, Fianna was shaped by the Anabaptist faith that strengthened her through tuberculosis and early death at age 29. Virtual on Zoom

First settled by migrant fishermen, Venice rose to become a powerhouse of Mediterranean commerce. Adding luster to its civic glory were the paintings of Titian, the music of Vivaldi, and the gilded domes of St. Mark's Basilica. But behind the dazzling façade, scandal and violence flourished in the shadows. The nineteenth century brought doom and decay, then rebirth as one of the world's top sightseeing destinations. This course allows you to explore – from the comfort of your home – the turbulent history, brilliant culture, and magical beauty of Venice.

GERMAN SECRET WEAPONS AND THE END OF THE SECOND WORLD WAR IN EUROPE

Instructor: Dr. Tami Biddle

Tuesday, November 9, 2021

1:30 pm - 3:30 pm

Virtual on Zoom

Enrollment Limit: None

In the summer and autumn of 1944, an array of German secret weapons began appearing on the battlefields of Europe. These included the V1 flying bomb, the Me 262 jet fighter, and, most ominously, the V2 rocket - the world's first ballistic missile. The Allies had been anxious about the potential appearance of these weapons for years, so their manifestation on the battlefield seemed like a nightmare come true. And it was unclear what else the Germans might have up their sleeve - an atomic bomb, perhaps? The desire of the Anglo-Americans to get the war over with as quickly as possible led to several weighty and consequential decisions, including the decision to launch a powerful air campaign against Germany in February 1945 - a campaign that included the air attack on the city of Dresden.

AMERICAN WOMEN IN THE 1950s: WERE THEY ALL JUNE CLEAVER?

Instructor: Dr. Susan Rimby

Wednesday, November 17, 2021

2:00 pm - 3:00 pm

Virtual on Zoom

Enrollment Limit: None

Americans typically think of the 1950s as a decade where women left the World War II labor market and resumed the roles of wife and mother. But labor market forces, trends in education, and pent-up consumer demand propelled many wives and mothers back into paid employment. Why did this happen? How did it affect employers and families? And what were the implications of this trend for the women's movement?

HOW CHRISTIAN ART AND ARCHITECTURE CAME TO BE

Instructor: Dr. Susanna Caroselli

Mondays, September 20, 27 & October 4, 2021

10:00 am - 11:30 am

Virtual on Zoom

Enrollment Limit: None

“Christian” art and architecture didn’t appear until the middle of the 3rd century, long after the development of Christian worship and theology. What took so long? Or was it there and we just don’t recognize it? There are fascinating mysteries in the visual emergence of a new religion in an ancient world, where gods, emperors, magicians, chameleons, and donkeys could be transformed, and tombs, courtrooms, and laundries could be converted by Christian creativity. Visit catacombs and villas to follow the flights of imagination of a new faith and its visual expression.

THE GREAT AMERICAN FILMS: THE AMERICAN FILM INSTITUTE’S TOP 100 AMERICAN FILMS (PART 1)

Instructor: Dr. Roger Godin

Tuesdays, September 21, 28 & October 12, 19, 26, 2021

3:00 pm - 4:30 pm

Virtual on Zoom

Enrollment Limit: None

In 1998, the American Film Institute (AFI) polled over 1500 artists and film industry leaders to gather their votes for the top 100 American films of all time. These “arbiters of excellence” chose from a list of 400 nominated films. The criteria included critical recognition, major awards won, popularity over time, historical significance, and cultural

impact. Controversy ensued as often happens with any list of excellence. The AFI produced a revised list in 2007, and films were dropped, others added, some moved up, and others dropped down. This 2007 list will serve as the basis for the course.

In Part 1 we will count down from #100 to #51. For each film, we will examine the historical and cultural context, the impact of each film on the art of feature narrative films, and discuss why this film found its way onto this exalted list. Clips will be shown for each film. Part 2 will be offered in Spring 2022.

Come with an open mind, and you’ll gain a new appreciation for the achievements of this brilliant, thousand-year tradition.

TURNING HISTORY INTO HISTORICAL FICTION...OR TELLING IT LIKE IT IS

Instructor: Ms. Kyra Robinov

Tuesday, November 16, 2021

3:00 pm - 4:00 pm

Virtual on Zoom

Enrollment Limit: None

We've all got family histories, some more intriguing than others. But turning our ancestors' tales from simple word-of-mouth recollections into a novel that's descriptive, detailed and filled with tension is daunting. Especially when your long lost relatives are no longer alive and there is little factual information upon which to draw. On the other hand, sometimes the writer prefers to remain faithful to the actual story rather than embellishing it to follow a dramatic arc. Author Kyra Robinov describes the challenge of both recreating the survival story of her grandmother Luba in her fictional *Red Winter* and finding the drama in her father's story, which spanned the 20th century and the globe, in her non-fiction memoir/biography, *HiStory*.

Instructor: Dr. Joseph Karlesky

Wednesday, October 20, 2021

10:00 am - 11:30 am

Virtual on Zoom

Enrollment Limit: None

This session will examine the sometimes smooth and often rocky relationship between science and government in the debate over public policy goals and their implementation. The use of nuclear weapons in war, the landing of humans on the moon, and the vanquishing of disease all exemplify the interplay of scientists and politicians in the pursuit of public policies. Debates over vaccination, biotechnologies, and climate change all illustrate the turbulent search for truth and appropriate policy action in a time of sharply polarized politics.

Since 1912, tourists have flocked to the Smithsonian to see the gowns of our First Ladies. By the 1960s, moved to larger quarters in what eventually became the National Museum of American History, the First Ladies exhibit included White House china and personal accessories, although the gowns remained the centerpiece of interest. But over time our understanding and appreciation for the roles played by First Ladies widened beyond that of fashion icons to include activism in a variety of areas, including that of hostess, policy advocate, active public service, political campaigner, and promoter of the arts. Our program focuses on that evolution, starting well before the term "First Lady" even gained public usage and continuing through Jill Biden.

This research investigates the intricate braiding of political, scientific, and danced representations of the body, focusing particularly on blackface minstrelsy and on ballet in antebellum Philadelphia, a city both representative of national trends and also distinct in its cultural, historic, and geographic position.

Instructor: Professor Robert Power

Fridays, September 17 & 24, 2021

10:00 am - 11:00 am

High Auditorium, Crossings Building, Landis Homes
Enrollment Limit 25

The First Amendment is just one sentence of the U.S. Constitution, but it has produced a library's worth of analysis. It contains six separate rights, each of which presents legal and policy issues that few judges or lawyers have mastered. Yet it is also one of the most accessible provisions in the Constitution – almost everyone understands that speech and religion are to be “free.” The first session will introduce the First Amendment and then address several contemporary speech problems. The second session will focus on the two religious clauses of the First Amendment, addressing problems that show that people can be in agreement about the meaning of the clauses, and still in strong disagreement about results in individual cases.

Against the background of ideological ideas that have divided the nation for centuries, the election of Donald Trump in 2016 brought these divisions to a head. The lecture will trace the evolution of these choices and how such as immigration policy, voting rights, among other views of the future of the country, led to the belief among many that the election was fraudulent.

Things that happened in the air or on the ground and with real people - engineers, test pilots, etc. All of these stories are not based on rumors, but will be things in which the instructor had a personal involvement. He will try his best to make these stories equally puzzling to the non-engineer.

DOUGHNUT ECONOMICS

Instructor: Dr. Lawrence Rupley

Thursday, October 28, 2021

1:00 pm - 2:30 pm

High Auditorium, Crossings Building, Landis Homes
Enrollment Limit 25

Humanity's challenge in the 21st century is global - to eradicate poverty and achieve prosperity for all within the means of the planet's limited natural resources. Economist Kate Raworth presents a visual framework - shaped like a doughnut. This model brings planetary boundaries (such as healthy climate, biodiversity, limited land, and freshwater) together with social boundaries (such as necessary levels of food and water availability, adequate jobs and income, health, and education) to create a safe and just space in which humanity can thrive and the planet survive. To move into this space demands far greater fairness - within and between countries - in the use of natural resources, and far greater efficiency to transform those limited resources to meet human needs than at present.
